

User story backlog da hazir bir sekilde verilmis

Create→Test set olustur → user story e link et

2- test case leri olsturmaya basla → link et test set ile ve user story ile- test details de type—cucumber sec, -

scenario

Given the user is logged in as "Human Resource"

When the user clicks on "Task" tab on the quick navigation

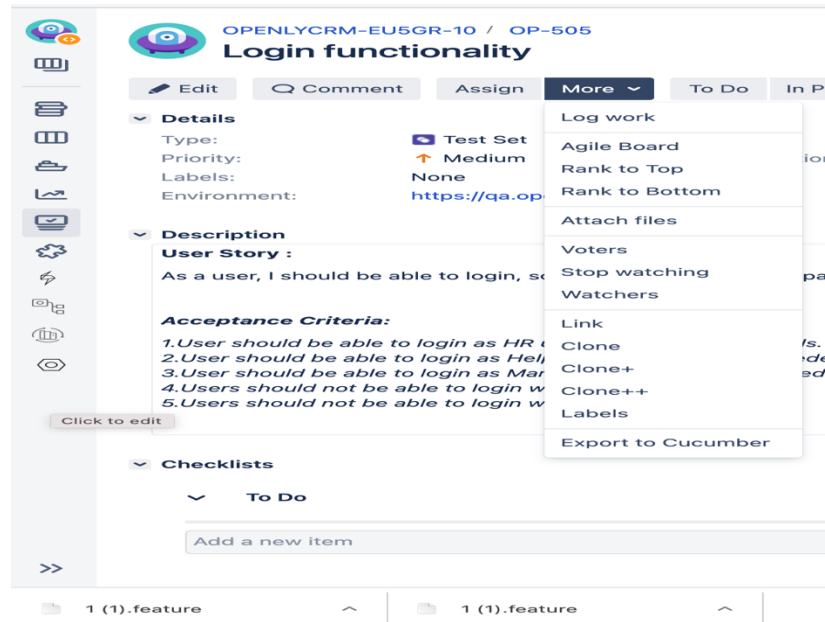

And the user clicks on the "Checklist" link in Task

And the user enters "This is the first checklist item" as description

And the user clicks on the checkmark

Then the "This is the first checklist item" check list item should be added to the list

Sonra ki kısmi

Test set → more ->export to cucumber tikla → sol alt koseye feature diye bir dosya inecek-> bu dosyayi maus ile tut ve intelliJ de resources file inin icinde bulunan features adli paket e getir ve uzerine birak. Sonra # ile baslayan yazilari sil (gereksiz) daha iyi bir gorunum elde etmek icin

Test execution → more→import execution result a tikla → choose file karsimiza cikar → intelliJ de target in icinde bulunan cucumber.json I mous ile tut ve jirada Choose file yazisinin uzerine surukle → boylece butun test execution lar otomatik yuklenmis olur jiraya

Import Execution Results

Choose file

No file chosen

The file with the execution results for the Test Execution.

Import

Cancel
